

## Vasion Print Quick Start Guide

Below are the steps necessary to start your Vasion Print product trial. You can find detailed configuration settings online by going to the [Vasion Print Documentation](#).

### Trial Preparation Checklist

	Description	Note / URL
<input type="checkbox"/>	Register for your Vasion Print SaaS Instance	Use the URL provided by your Vasion representative.
<input type="checkbox"/>	Check the instance Requirements and Supported Environments	<a href="#">Requirements</a> . If your setup includes a web proxy system, please pay special attention to the URL allow lists.
<input type="checkbox"/>	Provide a test system (Windows, Mac, or Linux) where you can configure the Vasion Print Admin Console, and test the printer installation and deployment.	You can use a physical or virtual system.
<input type="checkbox"/>	Have the information available for at least one output device to manage, using Vasion Print.	Printer model, IP / Hostname, the printer driver from the printer vendor.
<input type="checkbox"/>	Optional: Windows Print Server and printer information to import an output device from the server into Vasion Print.	Requires a Windows account with local admin rights on the Windows Print Server.
<input type="checkbox"/>	Download the Vasion Print Client installation package for software deployment or manual installation on the test system.	<a href="#">Client Installation</a> .

You are now ready to begin testing the Vasion Print core printer management features.

### Additional Vasion Print Features

- Secure Admin access with an existing Identity Service Provider (IdP).
- Control Panel Application (CPA) for Secure Release at the printer display and Simplified Scanning.
- Simplified Scanning with Scan To Cloud and Scan To Email.
- Mobile Printing (Android & iOS)
- Secure Release Print including:
  - Pull Print (Follow the User).
  - Direct Secure Release.
  - Off-Network Print for a zero-trust environment including Off-Network Cloud Printing.
- Vasion Output solutions for high-volume printing environments using EMR / ERP systems.
- And more

## Requirements for Advanced Feature Testing

	Description	Note / URL
<input type="checkbox"/>	Vasion Print Client installed and printer(s) deployed	Your Admin Console Home URL <a href="https://yourcompany.printercloud5.com">https://yourcompany.printercloud5.com</a> .
<input type="checkbox"/>	Connect your IdP tenant.	Via SAML 2.0, OIDC, or LDAP. <a href="#">IdP Providers</a> .
<input type="checkbox"/>	Provide a system (Windows, Mac, or Linux) that has the Vasion Print Client installed and authorized to delegate as a Vasion Print Service Client.	You can use a physical or virtual system. <a href="#">Service Client Configuration</a>
<input type="checkbox"/>	Enable any required microservice(s).	For example, SNMP, Email Print, Printer Apps, Identity Sync, etc.
<input type="checkbox"/>	Enable SNMP.	Know the SNMP community name that is configured on the printers. You can find SNMP data in the <b>Status</b> tab and <b>Printer Info</b> tab.
<input type="checkbox"/>	Prepare for the CPA installation.	Configure any necessary identification methods (RFID badge, User credentials, PIN authentication). Verify <a href="#">printer models supported by the CPA</a> . If you use IdP custom attributes, you must define the custom mapping see the <a href="#">Print Release</a> section.
<input type="checkbox"/>	Deploy the CPA.	Requires a <a href="#">Service Client Configuration</a> and to open <a href="#">specific printer manufacturer network ports</a> .
<input type="checkbox"/>	Configure Simple Badge Release.	<a href="#">Simple Badge Release Configuration</a>
<input type="checkbox"/>	Configure Simplified Scanning.	<a href="#">Simplified Scanning</a> offers Scan To Email and Scan To Cloud.
<input type="checkbox"/>	Mobile Print with Android & iOS.	Implement the PrinterLogic App available on the <a href="#">App Store</a> and <a href="#">Google Play</a> .
<input type="checkbox"/>	Configure Email Printing.	For cases where the PrinterLogic App is not an option. <a href="#">Email Printing</a> .
<input type="checkbox"/>	Configure Off-Network Print.	<a href="#">ONP</a> requires a Service Client with Internal Routing Service (IRS) enabled. At least one <a href="#">External Gateway</a> and at least one IRS added to the <b>Services</b> tab at the folder level.
<input type="checkbox"/>	Learn about our Vasion Output solutions.	<a href="#">Output Automation</a> .
<input type="checkbox"/>	Try Web Print, our newest feature.	<a href="#">Web Print</a> .

Contact your Vasion Account Manager if you require configuration support from one of our System Engineers during the trial period.
